RE: Application for the position of software developer, reference 145785

Dear Madam:

I would like to apply for the position of software developer, which I saw advertised on www.itjob.ca. Your company is known throughout the world for its management software used by more than 30 million people every day, and represents a true career opportunity for me. Working on a young, talented and cutting-edge development team would allow me to build on my skills and contribute to your future success.

I have worked for Management 2000 for four years as a developer on a business tracking software project. This has allowed me to develop a high level of programming, database and operating systems expertise. This year, the company entrusted me with developing the ASP-based version of the planning module, which enhanced my Web technology skills.

I trust that my application will pique your interest, and am available to come in for an interview.

Yours truly,

Laurent Perrier
